AI-ENABLED DEVOPS · PLATFORM ENGINEERING · CLOUD

Hemant Sharma.

Platform Engineering Tech Lead

I'm a platform engineering tech lead developing AI-assisted DevOps capabilities with GitHub Copilot—from AIDLC deployment agents and reusable skills to release monitoring, centralized deployments, and lifecycle automation. I bring over nine years of experience building Azure and AWS, Kubernetes, and CI/CD platforms, with a focus on applying AI to make software delivery more consistent, observable, and secure.

Gurugram, Haryana, India

01 / PROFILE

CURRENTLY

Platform Engineering Tech Lead

PUBLICIS SAPIENT

Leading a team of six engineers while developing AI-enabled workflows for deployment, release visibility, and operational knowledge.

FOCUS AI-enabled DevOps / Agentic deployment workflows / Cloud platform engineering

WHAT I BRING

Built for the *complex stuff.*

01

AI-assisted DevOps

Developing AIDLC deployment agents and reusable skills, plus AI-enabled release monitoring, documentation, and lifecycle workflows.

02

Platform engineering

Kubernetes platform design and administration across AKS and EKS, with standardized environments and reusable infrastructure.

03

Cloud & automation

Azure and AWS architecture, Terraform infrastructure as code, cloud cost optimization, and deployment automation.

04

Delivery, reliability & leadership

GitHub Actions and Jenkins CI/CD, GitOps, observability, incident response, technical mentorship, and team leadership.

THE JOURNEY SO FAR

Experience.

Nine years of building, improving, and operating the systems behind great products.

CURRENT ROLE

Jul 2023 – Present

Sr. Associate Infrastructure Engineer L2 / Platform Engineering Tech Lead

Publicis Sapient

Leading platform engineering initiatives for enterprise healthcare systems across development, QA, staging, and production environments.

- Built GitHub Copilot–driven AI DevOps workflows to streamline deployment, release visibility, and operational knowledge across four environments: development, QA, staging, and production.
- Led a team of six engineers to standardize platform delivery for enterprise healthcare workloads, improving release confidence and reducing handoff friction.
- Automated AKS, Azure Databricks, and Azure Data Factory deployments with GitHub Actions and Terraform, accelerating provisioning and minimizing manual release effort.
- Established GitOps delivery with ArgoCD and observability using Prometheus and Grafana, improving traceability, incident response, and operational stability.

TOOLS GitHub Actions · Kubernetes · AKS · Terraform · Azure · Helm · ArgoCD · Grafana · Prometheus

---

Apr 2022 – Jul 2023

Sr. Software Engineer L1 / DevOps & Platform Engineering

Rakuten India

Supported large-scale e-commerce platform infrastructure with a focus on Kubernetes reliability, automation, and observability.

- Managed production AKS clusters and built scalable GitHub Actions deployment pipelines.
- Automated infrastructure lifecycle with Terraform and standardized Kubernetes releases with Helm.
- Improved monitoring and incident response with Grafana, Prometheus, Azure Monitor, and App Insights.

Jun 2021 – Mar 2022

Sr. DevOps Engineer

Q3 Technologies

Designed cloud infrastructure and CI/CD solutions for enterprise healthcare platforms across AWS and Azure.

- Implemented CI/CD automation and deployment workflows using Jenkins and GitHub Actions.
- Designed highly available, fault-tolerant cloud environments and delivered technical training.

May 2020 – Apr 2021

Solutions Architect

MySense Technologies

Built cloud-native infrastructure automation and backend deployment platforms across AWS and Azure.

- Contributed to Stackabl, a one-click deployment platform for CMS applications.
- Designed microservices-oriented environments and automated deployments for WordPress, Drupal, Joomla, and Magento.

Jul 2018 – Apr 2020

Systems Engineer

Ranosys Technologies

Delivered DevOps transformation and CI/CD modernization for mobile application platforms.

- Implemented infrastructure automation with Terraform and Ansible.
- Designed enterprise deployment workflows and managed Kubernetes and Docker environments.

Jul 2017 – Jul 2018

IT Consultant / Contract

Red Bull India

- Managed enterprise IT infrastructure and networking operations, troubleshooting, and support.
- Maintained ticketing workflows and followed enterprise IT security practices.

SELECTED WORK

Projects in *practice.*

A few examples of platform, automation, and cloud work across teams and industries.

AI-ASSISTED DEVOPS · IN DEVELOPMENT

AI-enabled DevOps tooling

Developing with GitHub Copilot an AI-assisted toolset designed to improve release visibility, deployment consistency, secure credential operations, and operational knowledge.

- AIDLC deployment agents and reusable skills
- GitHub Actions release-monitoring dashboard
- Secrets and certificate lifecycle manager
- AI DevOps assistant and automated documentation agent
- Feature lifecycle monitoring and centralized deployment orchestration

GitHub Copilot · GitHub Actions · AIDLC

CLOUD-NATIVE PLATFORM

Optum Martech Platform

Built Kubernetes delivery automation, managed AKS and Terraform provisioning, and enabled GitOps workflows for production.

GitHub Actions · Helm · ArgoCD · Prometheus · Grafana

E-COMMERCE

Rakuten IAM

Supported the In-App Messaging platform with production AKS, ingress and TLS automation, standardized deployment pipelines, and observability.

AKS · GitHub Actions · Prometheus · Grafana · Azure Monitor

HEALTHCARE

WHO Swasth E-Gurukul

Designed secure three-tier Azure architecture with high-availability services, Azure Database for MySQL, and IAM controls.

Azure · MySQL · IAM · Load balancing

DEPLOYMENT PLATFORM

Stackabl Platform

Developed Bash automation and microservices-based deployment infrastructure for one-click CMS application deployments.

AWS · Azure · Docker · Nginx · Bash

APPLICATION INFRASTRUCTURE

Equabli

Implemented Jenkins CI/CD pipelines for Java applications and managed highly available AWS infrastructure and application environments.

Jenkins · Java · AWS EC2 · Tomcat · PostgreSQL

THE TOOLKIT

Tools for the *whole stack.*

Cloud	Azure · AWS · AKS · EKS · EC2 · VPC · Azure Databricks · Azure Data Factory · RDS · S3
Platform & delivery	Kubernetes · Docker · Helm · Terraform · Ansible · GitHub Actions · Jenkins · ArgoCD · GitOps · CI/CD
Reliability & security	Prometheus · Grafana · ELK Stack · Azure Monitor · CloudWatch · DevSecOps · IAM/RBAC · Key Vault

Automation	Python · Bash · Linux · Nginx · YAML · Git · Microservices · Configuration management
AI & DevOps tooling	GitHub Copilot · AI Development Lifecycle (AIDLC) · Deployment agents and skills · Release monitoring · Deployment orchestration
Leadership	Technical leadership · Team management · Mentorship · Cross-functional collaboration · Production operations

CREDENTIALS

Learning, always.

HashiCorp Certified: Terraform Associate (003)	2024–2026
Microsoft Certified: Azure Administrator (AZ-104)	2022–2024
AWS Certified Solutions Architect – Associate	2019–2022

EDUCATION

Strong foundations.

Bachelor of Technology

Rajasthan Technical University

2012 – 2016

LANGUAGES Hindi — Native / English — Professional Working Proficiency

HAVE A PLATFORM CHALLENGE?

Let's make *it work better.*
