PROFESSIONAL SUMMARY

Platform Engineer Tech Lead with 9 years of experience designing scalable cloud platforms, Kubernetes infrastructure, CI/CD ecosystems, and developer enablement solutions across Azure and AWS environments. Proven expertise in leading DevOps transformation initiatives, building enterprise-grade platform engineering capabilities, and driving automation across large-scale production systems.

Currently leading a team of engineers delivering cloud-native infrastructure solutions for enterprise healthcare platforms using Kubernetes, Terraform, GitHub Actions, Azure Databricks, and GitOps practices. Strong background in platform reliability, observability, infrastructure automation, developer productivity, and multi-cloud architecture.

Specialized in:

- Kubernetes Platform Engineering (AKS/EKS)
 - GitHub Actions CI/CD Architecture
 - Terraform Infrastructure as Code
 - Azure & AWS Cloud Platforms
 - GitOps & ArgoCD
 - Observability & Monitoring Platforms
 - Developer Enablement & Automation
 - Cloud Cost Optimization
 - SRE & Production Reliability
 - Team Leadership & Technical Mentorship
 - Vulnerability Management • DevSecOps • Security Governance • Compliance & Risk Management
-

CORE TECHNOLOGIES

Cloud & Infrastructure

Azure:

AKS (Kubernetes) • Azure Virtual Network (VNet) • Azure Data Factory • Azure Databricks • Azure Monitor • Azure Application Insights • Virtual Machine Scale Sets (VMSS) • Azure Database for MySQL/PostgreSQL • Azure App Services • Storage Accounts • Azure DNS • Application Gateway • Azure Load Balancer • Azure Front Door • Azure Traffic Manager • Azure Logic Apps • Azure Functions • Azure Advisor • Azure Static

Web Apps • Private Endpoints • Azure Key Vault • Azure Container Registry (ACR) • Azure Bastion • Network Security Groups (NSG) • Azure IAM (RBAC & Policies)

AWS:

EKS (Kubernetes) • ECS • EC2 • EC2 Auto Scaling • Application Load Balancer (ALB) • Network Load Balancer (NLB) • Route 53 • VPC • Subnets • Security Groups • NAT Gateway • Internet Gateway • Elastic IP • Transit Gateway • S3 • EBS • EFS • RDS • DynamoDB • CloudWatch • CloudTrail • AWS Config • GuardDuty • IAM • KMS • Secrets Manager • AWS Certificate Manager (ACM) • AWS Lambda • Systems Manager (SSM) • CloudFormation • CodePipeline • CodeBuild • CodeDeploy • Elastic Container Registry (ECR) • AWS Backup • SNS • SQS

Platform Engineering & DevOps

Kubernetes Platform Engineering • AKS/EKS Administration • Docker & Containerization • Helm Charts • GitHub Actions • Jenkins • ArgoCD • GitOps Workflows • Terraform (Infrastructure as Code) • CI/CD Architecture • Release Engineering • Infrastructure Automation • DevSecOps • Platform Reliability Engineering • Environment Standardization • Deployment Automation • Developer Platform Enablement

Observability & Reliability

Prometheus • Grafana • ELK Stack (Elasticsearch, Logstash, Kibana) • Uptime Kuma • Azure Monitor • Azure Application Insights • CloudWatch • Centralized Logging • Event-Driven Alerting • Observability Engineering • Monitoring • Incident Management • Production Reliability • Troubleshooting

Development & Automation

Python • Bash/Shell Scripting • Linux Administration • Nginx • YAML • Git • Automation Scripting • Infrastructure Automation • Microservices Architecture • Configuration Management

Leadership & Operations

Technical Leadership • Team Management • Cross-functional Collaboration • Documentation • Production Operations • Troubleshooting

PROFESSIONAL EXPERIENCE

PUBLICIS SAPIENT

Sr. Associate Infrastructure Engineer L2 / Platform Engineering Tech Lead

Jul 2023 – Present

Leading platform engineering initiatives for enterprise healthcare systems across development, QA, staging, and production environments.

Key Achievements

- Leading a team of 6 engineers to deliver scalable cloud-native platform solutions.
- Architected and maintained enterprise CI/CD ecosystems using GitHub Actions.
- Designed reusable Terraform modules for standardized infrastructure provisioning.
- Managed AKS-based Kubernetes platforms supporting production workloads.
- Built deployment automation for Azure Databricks and Azure Data Factory.
- Implemented observability stack using Prometheus, Grafana, and event-driven alerting.
- Improved deployment reliability and reduced manual operational overhead through automation.
- Established GitOps workflows using ArgoCD for Kubernetes deployments.
- Collaborated with development and QA teams to streamline release engineering processes.
- Led incident management, production troubleshooting, and operational support.

Technologies

GitHub Actions • Kubernetes • AKS • Docker • Terraform • Azure • Databricks • Azure Data Factory • Helm • ArgoCD • Grafana • Prometheus • Bash

RAKUTEN INDIA

Sr. Software Engineer L1 – DevOps / Platform Engineering

Apr 2022 – Jul 2023

Worked on large-scale e-commerce platform infrastructure with focus on Kubernetes reliability, automation, and observability.

Key Achievements

- Managed production-grade AKS Kubernetes clusters with high availability configurations.
- Built scalable GitHub Actions pipelines for automated application deployments.
- Automated infrastructure provisioning and lifecycle management using Terraform.
- Improved monitoring and incident response using Grafana, Prometheus, Azure Monitor, and App Insights.
- Optimized Azure resource utilization and cloud cost efficiency.
- Standardized Kubernetes deployments using Helm charts.
- Supported production systems with strong focus on uptime, scalability, and reliability.

Technologies

GitHub Actions • Kubernetes • AKS • Docker • Terraform • Azure • Helm • Prometheus • Grafana • Azure Monitor • App Insights • Bash

Q3 TECHNOLOGIES

Sr. DevOps Engineer

Jun 2021 – Mar 2022

Designed cloud infrastructure and CI/CD solutions for enterprise healthcare platforms across AWS and Azure.

Key Achievements

- Designed scalable and highly available cloud infrastructure solutions.
- Implemented CI/CD automation pipelines for multiple enterprise projects.
- Automated deployments using Jenkins and GitHub Actions.
- Enabled fault-tolerant cloud environments across AWS and Azure.
- Conducted technical training sessions and promoted DevOps best practices.
- Improved deployment consistency and operational efficiency.

Technologies

Jenkins • GitHub Actions • Kubernetes • Docker • Bash • Azure • AWS

MYSENSE TECHNOLOGIES

Solutions Architect

May 2020 – Apr 2021

Worked on cloud-native infrastructure automation and backend deployment platforms.

Key Achievements

- Built cloud infrastructure solutions across AWS and Azure.
- Contributed to Stackabl, a one-click deployment platform for CMS applications.
- Developed backend automation scripts using Bash.
- Designed microservices-oriented deployment environments.
- Automated deployment workflows for WordPress, Drupal, Joomla, and Magento.

Technologies

AWS • Azure • Docker • Nginx • Bash • Microservices

RANOSYS TECHNOLOGIES

Systems Engineer

Jul 2018 – Apr 2020

Delivered DevOps transformation and CI/CD modernization initiatives for mobile application platforms.

Key Achievements

- Implemented infrastructure automation using Terraform and Ansible.
- Designed CI/CD workflows for enterprise mobile application deployments.

- Managed Kubernetes and Docker-based deployment environments.
- Conducted internal training and knowledge-sharing sessions.
- Improved scalability, deployment reliability, and automation maturity.

Technologies

Jenkins • Terraform • Kubernetes • Docker • Ansible • GitHub Actions • AWS • Azure • Bash

RED BULL INDIA

IT Consultant (Contract)

Jul 2017 – Jul 2018

Key Achievements

- Managed enterprise IT infrastructure and networking operations.
- Provided system troubleshooting and operational support.
- Maintained ticketing workflows and issue resolution processes.
- Ensured adherence to enterprise IT security practices.

Technologies

Windows • Networking • Active Directory • Microsoft Office • Storage Systems

SELECTED PROJECTS

Optum Martech Platform

- Built Kubernetes deployment automation using GitHub Actions, Helm, and ArgoCD.
- Managed AKS infrastructure and Terraform-based provisioning.
- Implemented observability stack using Prometheus and Grafana.
- Automated deployments for Databricks, Kubernetes, and Azure Data Factory.
- Enabled GitOps-driven deployment workflows for production environments.

Rakuten IAM (In-App Messaging)

- Managed production-grade AKS cluster with Ingress, TLS automation, and Helm.
- Built CI/CD automation pipelines using GitHub Actions.
- Implemented enterprise observability using Prometheus, Grafana, Azure Monitor, and App Insights.
- Improved Kubernetes deployment standardization and reliability.

Equabli

- Implemented Jenkins-based CI/CD pipelines for Java applications.
- Managed highly available AWS EC2 infrastructure.

- Configured Apache Tomcat and PostgreSQL-based application environments.

WHO Swasth E-Gurukul

- Designed secure three-tier Azure architecture.
- Implemented high availability and load-balanced backend services.
- Configured Azure Database for MySQL.
- Managed IAM and cloud security controls.

Stackabl Platform

- Developed backend automation using Bash scripting.
 - Enabled one-click deployment architecture for CMS platforms.
 - Designed microservices-based deployment infrastructure.
-

CERTIFICATIONS

HashiCorp Certified: Terraform Associate (003)

2024-2026

Microsoft Certified: Azure Administrator (AZ-104)

2022-2024

AWS Certified Solutions Architect – Associate

2019-2022

EDUCATION

Bachelor of Technology

Rajasthan Technical University
2012 – 2016

ADDITIONAL INFORMATION

Professional Strengths

- Strong expertise in Platform Engineering and DevOps transformation.
- Hands-on experience with Kubernetes, GitOps, CI/CD, and Infrastructure as Code.
- Proven leadership in managing engineering teams and enterprise production environments.
- Passionate about automation, reliability engineering, and developer enablement.

- Continuous learner through official documentation, KodeKloud, Udemy, technical books, and hands-on labs.

Languages

- Hindi — Native
- English — Professional Working Proficien
